

Norn

Desktop contract automation for MSAs, SoWs, and data service agreements

Mimir Labs | Concept

Turn contract chaos into structured desktop workflow.

Norn ingests legacy contracts, extracts reusable fields and clause blocks, presents them as guided UserForms, and exports clean PDFs—without Word tab roulette, Acrobat contortions, or browser refresh lag.

Core promise

- Ingest prior agreements and scanned PDFs
- Convert recurring terms into guided fields
- Edit with point-and-click precision

Workflow

What Norn does

- Ingests legacy agreements and scanned contracts
- Maps recurring terms into reusable guided fields
- Exports consistent PDFs from structured inputs

Why desktop first

- No browser refresh loops or tab sprawl
- Fast interaction with document-heavy workflows
- Better fit for sensitive contract handling

Who buys it

- In-house legal and legal ops
- Procurement, vendor management, and rev ops
- Data services teams handling schedules and DPAs

Why it exists

Desktop preview

of Work Builder

Clause Map

- ☒ Master terms
- ☒ Services
- ☒ Fees
- ☐ Security addendum

Guided Form
