

tSDR Procedure for Clean Independent-Contractor Operation

This procedure is mandatory for any tSDR working with Mimir Labs on a contractor basis.

Purpose

The goal is to keep the relationship clean, commercially effective, and defensible as an independent-contractor arrangement rather than an employee-like sales role.

Non-Negotiable Rules

1. Do not misrepresent Mimir Labs, its products, pricing, capabilities, delivery status, customer count, or roadmap.
2. Do not snake leads. If an account is already in the CRM, it is not yours unless Mimir Labs explicitly reassigns it.
3. Do not bind Mimir Labs to terms, prices, deadlines, discounts, legal commitments, or product promises.
4. Do not present yourself as an employee, officer, partner, or agent with authority to sign on behalf of the company.

Before You Touch Any Lead

Complete all of the following first:

- Sign the contractor agreement and commission schedule.
- Provide tax and payment information.
- Provide a business identity suitable for contractor work:
 - existing business entity, or
 - sole proprietorship under your legal name, or
 - properly registered fictitious name if you use a business name.
- Provide a working invoicing method.
- Provide a business email address or clearly business-use contact information.
- Confirm that you understand the attribution, tail, clawback, and pay-as-paid rules.

If these items are not complete, you are not authorized to prospect.

How You Must Operate

You are responsible for your own:

- schedule
- outreach method

- tools
- lead research process
- follow-up cadence
- expenses
- work location

Mimir Labs is buying results, not supervising your daily process.

You may sell using your own style, provided you stay within approved positioning and factual claims.

Lead-Sourcing Procedure

1. Check the CRM before contacting any prospect.
2. If the account already exists, do not contact it unless reassigned.
3. If the account does not exist, create it in the CRM before outreach.
4. Enter accurate source notes immediately.
5. Log major activity honestly and promptly.
6. If an inbound lead arrives that you did not create, do not claim it unless Mimir Labs explicitly assigns it.

What You May Say

You may use approved positioning, pricing, and pilot language supplied by Mimir Labs.

You may describe:

- the current public offering
- the current pilot status
- published pricing
- approved use cases
- approved onboarding steps

You may not invent:

- implementation promises
- legal assurances
- compliance claims not approved by Mimir Labs
- custom feature commitments
- delivery dates
- discounts
- exclusivity terms

Handoff Procedure

When a prospect becomes real, your job is to move the account into a clean founder handoff.

A qualified handoff must include:

- correct contact info
- company name
- how they heard about the product or why they are interested
- product of interest
- specific pain point
- buying stage
- any timing signals
- any pricing or pilot questions already raised

Do not continue freelancing the deal once founder handoff is requested.

Commission Hygiene

- Commission is pay-as-paid only.
- No payment is owed on unsigned interest, verbal intent, or unpaid commitments.
- Ratatosk eligibility requires the defined signed paperwork and collected deposit.
- Norn eligibility requires collected pilot or subscription revenue.
- Clawbacks are 100% under the agreement.
- Tail treatment is governed only by the written commission schedule.

Independence Requirements

To preserve contractor status, you must operate like an independent business.

That means:

- use your own methods
- work on your own time
- use your own equipment and accounts unless access to a Mimir system is specifically required
- bear your own routine business costs
- avoid representing Mimir Labs as your employer

Records You Must Keep

Maintain your own records for:

- outreach activity
- invoices
- commissions received
- business expenses
- tax filings
- any business registration documents you use

When to Escalate Immediately

Escalate to Mimir Labs before acting if:

- a lead asks for legal terms
- a lead asks for custom pricing or custom scope
- a lead requests security, compliance, or data-processing commitments
- there is a sourcing dispute
- a prospect asks who can sign
- a prospect asks for product commitments beyond approved messaging

Default Principle

If you are unsure, do not improvise. Log the account, preserve the opportunity, and escalate.
